

TITAN SMALL BUSINESS SERVICES: SECURITY ARCHITECTURE DOCUMENT (SAD)

Operator: tpetgrave12 **Date:** May 10, 2026

1. Perimeter Hardening (UFW & SSH)

- **SSH Status:** Hardened. Disabled root login and password authentication by modifying `/etc/ssh/sshd_config` (PermitRootLogin no, PasswordAuthentication no).
- **Firewall Logic:** Implemented a "Default Deny" policy. Explicitly allowed Port 22 (SSH) and Port 8080 (App) to ensure a minimal attack surface.

2. The Automated Auditor (Python)

- **Script Logic:**

```
python import os import datetime target_dc = "8.8.8.8" status = os.system(f"ping -c 2 {target_dc} > /dev/null 2>&1") timestamp = datetime.datetime.now().strftime("%Y-%m-%d %H:%M:%S") with open("/tmp/dc_audit.log", "a") as log: if status == 0: log.write(f"[{timestamp}] DC CONNECTION SUCCESSFUL") else: log.write(f"[{timestamp}] DC CONNECTION FAILED") ## 3. Containerized App NAME IMAGE STATUS PORTS wiki nginx Up 33 minutes 0.0.0.0:8080->80/tcp db mysql Up 33 minutes 3306/tcp
